Dr Stephen Ojo MBBS, DRH, DFSRH, MMedSci (Medical Education), MACadMed, FHEA, CMALT

Specialty Doctor in Emergency Medicine, NUH & Honorary Assistant Professor, University of Nottingham, Lead for Technology Enhanced Education (UMED)

Miss Rebecca Raven, Support Services Manager, DREEM

AI Rx is a dynamic, hands-on workshop tailored for clinicians, educators, and healthcare professionals. This interactive experience is designed to equip attendees with a working knowledge of Artificial Intelligence tools that can enhance clinical education, diagnostics, research, and administrative efficiency. With a focus on practical application and live demonstrations, this course demystifies AI and empowers participants to integrate it into everyday healthcare practice.

By the end of the day, attendees will feel confident navigating the rapidly evolving landscape of clinical AI and walk away with tools that can immediately improve their workflows.

Previous Course Attendees said:

"I loved the interpretation of AI in our medical field and how helpful it can become."

"That AI is not rocket science – we can simplify it and use it effectively."

Previous Course Attendees said:

"A better understanding of how AI can help ease the burden of documentation and improve patient care."

"AI is coming – like it or not. We need to be ready."
